7 May 2012

Draft NC in relation to CACM FG

- Draft NC does widely address the areas from the CACM FG
- A step towards efficient congestion management
- Currently a lot of focus on procedures
- Numerous national approvals needed
- Symmetry of requirements on entities to be ensured
- Constructive stakeholder involvement process

Capacity calculation

- Acknowledges FG requirements
- Individual decisions and procedures vs. coordination:
  - Input definition
  - Reliability margins
  - …
- Capacity calculation regions
- Level of detail/explanation
- Regulatory approval subjects
- Long term capacity calculation

Bidding zones

- Thorough process description (2 steps)
- Market efficiency analysis by Regulators

Day-ahead allocation

- Relation to governance guideline will be taken into account, coordination:
  - Definitions
  - Functions, tasks & responsibilities
  - …
- Regulatory approval processes and contents

Intra-day allocation

- Pricing of capacities
- Included in the scope of to the governance guidelines
- Functions task & responsibilities
  - Role of central counterparties

Other issues

- Firmness
- Congestion management costs
- Regulators power to amend rules
