Transparency of fundamental electricity market information

Enhanced competition in Electricity Markets

Delivering much more information than exists today on a single platform

The most efficient solution

Reinforcing the benefit of the Network Codes and enabling more effective market monitoring

TSOs commitment to European Transparency

2006

2009

A pan-European initiative on a voluntary basis of TSOs

New European Rules: Publications become compulsory

2014

'EMFIP' Project: Electricity Market Fundamental Information Platform (anticipated since end of 2010)

“Establishment of a central information transparency platform”

entsoe

Reliable Sustainable Connected

www.entsoe.net …the existing transparency platform

- Simple and easy to use
- Information provided is voluntary
- Data providers – TSOs, PX, Auction offices, 3rd parties
- Users – traders, consultants, European Commission, ACER, Universities, individuals from over 100 countries worldwide
- Provides valuable operating experience & user feedback

- More than 5 years old
- Not a suitable basis for evolution to support all FEDT under the future transparency regulation

Continuation of Web Presence (not just a database)

entsoe.net – users around the world

Total Hits in 2012 = 376,145
(1030+ hits per day)

Over 100 countries

The legal obligations on the ENTSO-E Transparency Platform (Article 3)

For the end user:

- Free access to the platform (financed by national transmission tariffs)
- At least in English
- Data up to date, easily accessible, downloadable and available for at least 5 years
