4 works that comment on or otherwise explain it or assist in its implementation may be prepared,  
5 copied, published and distributed, in whole or in part, without restriction of any kind, provided  
6 that the above copyright notice and this paragraph are included on all such copies and  
7 derivative works. However, this document itself may not be modified in any way, except for  
8 literal and whole translation into languages other than English and under all circumstances, the  
9 copyright notice or references to ENTSO-E may not be removed.

10 This document and the information contained herein is provided on an "as is" basis.

11 **ENTSO-E DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT**  
12 **LIMITED TO ANY WARRANTY THAT THE USE OF THE INFORMATION HEREIN WILL NOT**  
13 **INFRINGE ANY RIGHTS OR ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR**  
14 **FITNESS FOR A PARTICULAR PURPOSE.**

15 **This document is maintained by the ENTSO-E CIM EG. Comments or remarks are to be**  
16 **provided at [cim@entsoe.eu](mailto:cim@entsoe.eu)**

17 **NOTE CONCERNING WORDING USED IN THIS DOCUMENT**

18 The force of the following words is modified by the requirement level of the document in which  
19 they are used.

- 20 • SHALL: This word, or the terms "REQUIRED" or "MUST", means that the definition is  
21 an absolute requirement of the specification.
- 22 • SHALL NOT: This phrase, or the phrase "MUST NOT", means that the definition is an  
23 absolute prohibition of the specification.
- 24 • SHOULD: This word, or the adjective "RECOMMENDED", means that there may exist  
25 valid reasons in particular circumstances to ignore a particular item, but the full  
26 implications shall be understood and carefully weighed before choosing a different  
27 course.
- 28 • SHOULD NOT: This phrase, or the phrase "NOT RECOMMENDED", means that there  
29 may exist valid reasons in particular circumstances when the particular behaviour is  
30 acceptable or even useful, but the full implications should be understood and the case  
31 carefully weighed before implementing any behaviour described with this label.
- 32 • MAY: This word, or the adjective "OPTIONAL", means that an item is truly optional. One  
33 vendor may choose to include the item because a particular marketplace requires it or  
34 because the vendor feels that it enhances the product while another vendor may omit  
35 the same item. An implementation which does not include a particular option **MUST** be  
36 prepared to interoperate with another implementation which does include the option,  
37 though perhaps with reduced functionality. In the same vein an implementation which  
38 does include a particular option **MUST** be prepared to interoperate with another  
39 implementation which does not include the option (except, of course, for the feature the  
40 option provides.).

41

## Revision History

Version	Release	Date	Comments
1	0	2016-05-11	Approved by Market Committee
2	0	2017-01-10	Version to be submitted to Market Committee following EDI meeting of 11 <sup>th</sup> and 12 <sup>th</sup> of January 2017 DocStatus, Status attributes and Reason classes added to send CRAC anomaly report AdditionalConstraint_RegisteredResources class added to describe a phase shift angle
2	1	2017-10-24	Version to be submitted to Market Committee following EDI meeting of 24 <sup>th</sup> and 25 <sup>th</sup> of October 2017 <ul style="list-style-type: none"> <li>- measurement_Unit.name and quantity.quantity attributes set to optional in the AdditionalConstraint_Series class</li> <li>- AggregateNodes added in the RemedialAction_RegisteredResource class</li> <li>- Related_MarketDocument association added at header level</li> <li>- Optimization_MarketObjectStatus attribute added at Series level</li> </ul>
2	2	2018-06-19	Version approved by MC. <ul style="list-style-type: none"> <li>- Addition of a MarketObjectStatus.status attribute in the AdditionalConstraint_RegisteredResource</li> <li>- Addition of a Monitored_Series</li> <li>- Addition of an association between the Party_MarketParticipant class and the sub_Series</li> <li>- In/out_Domain put to optional in the AdditionalConstraint_Series</li> </ul>
2	3	2019-09-10	This version of the IG takes into account the changes applied on v2.4 of CRAC document. Just for information v2.3 and v2.2 are the same, but v2.3 of the xsd fixes a small bug. <ul style="list-style-type: none"> <li>- pSRType.psrType in RemedialAction_RegisteredResource is optional</li> <li>- Analog class linked to RemedialAction_RegisteredResource class and Contingency_RegisteredResource class</li> <li>- New 0..1 price.Amount attribute within RemedialAction_Series</li> <li>- New 0..1 Related currency_Unit.name and 0..1 price_Measure_Unit.name within TimeSeries</li> <li>- New 0..1 MarketObjectStatus attribute linked to Contingency_RegisteredResource</li> <li>- Consequently small changes on the dependency tables and contextual and assembly models.</li> <li>- mRID of Document, Series and Timeseries (ID_String type) was enlarged from 35 to 60 characters.</li> </ul> <p>Approved by MC.</p>
2	4	2019-12-11	Some parts of this IG were removed in order to avoid duplications with the new Coordinated Capacity Calculation IG. Approved by MC.

## 116 **1 Introduction**

117 The purpose of this document is to provide the contextual and assembly UML models and the  
118 schema of the CRAC\_MarketDocument.

119 The schema of the CRAC\_MarketDocument could be used in various business processes.

120 It is not the purpose of this document to describe all the use cases, sequence diagrams,  
121 business processes, etc. for which this schema is to be used.

122 This document shall only be referenced in an implementation guide of a specific business  
123 process. The content of the business process implementation guide shall be as follows:

- 124 • Description of the business process;
- 125 • Use case of the business process;
- 126 • Sequence diagrams of the business process;
- 127 • List of the schema (XSD) to be used in the business process and versions of the  
128 schema;

129 For each schema, dependency tables providing the necessary information for the generation  
130 of the XML instances, i.e. when the optional attributes are to be used, which codes from which  
131 ENTSO-E codelist are to be used.

157

158 **2.2.3 Detailed CRAC assembly model**

159 **2.2.3.1 CRAC\_MarketDocument root class**

160 This document provides the contingency lists, remedial actions and additional constraints to be  
161 used for the coordinated capacity network studies.

162 Table 3 shows all attributes of CRAC\_MarketDocument.

163 **Table 3 - Attributes of CRAC assembly model::CRAC\_MarketDocument**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	The unique identification of the document being exchanged within the coordinated capacity calculation process.
1	[1..1]	revisionNumber ESMPVersion_String	The identification of the version that distinguishes one evolution of a document from another.
2	[1..1]	type MessageKind_String	The coded type of a document. The document type describes the principal characteristic of the document.
3	[1..1]	process.processType ProcessKind_String	The identification of the nature of process that the document addresses. --- The process dealt with in the document.
4	[1..1]	sender_MarketParticipant.mRID PartyID_String	The identification of a party in the energy market. --- Document owner.
5	[1..1]	sender_MarketParticipant.marketRole.type MarketRoleKind_String	The identification of the role played by a market player. --- Document owner. --- The role associated with a MarketParticipant.
6	[1..1]	receiver_MarketParticipant.mRID PartyID_String	The identification of a party in the energy market. --- Document recipient.
7	[1..1]	receiver_MarketParticipant.marketRole.type MarketRoleKind_String	The identification of the role played by a market player. --- Document recipient. --- The role associated with a MarketParticipant.
8	[1..1]	createdDateTime ESMP_DateTime	The date and time of the creation of the document.
9	[0..1]	docStatus Action_Status	The identification of the condition or position of the document with regard to its standing.
10	[0..1]	status Action_Status	Status of subject matter (e.g., Agreement, Work) this document represents. For status of the document itself, use 'docStatus' attribute.
13	[1..1]	time_Period.timeInterval ESMP_DateTimeInterval	The start and end date and time for a given interval. --- This information provides the start and end date and time of the constraint network elements study time interval. All time intervals for the time series in the document shall be within the total time interval for the study. The receiver will discard any time intervals outside the time period.
14	[1..1]	domain.mRID AreaID_String	The unique identification of the domain. --- The identification of the domain that is covered in the constraint network element document. It is in general the coordinated capacity determination area that is the subject of the schedule plan.

164

165 Table 4 shows all association ends of CRAC\_MarketDocument with other classes.

166  
167

**Table 4 - Association ends of CRAC assembly model::CRAC\_MarketDocument with other classes**

Order	mult.	Class name / Role	Description
11	[0..1]	MarketDocument Received_MarketDocument	Association Based On: CRAC contextual model::MarketDocument.Received_MarketDocument[0..1] ----- CRAC contextual model::CRAC_MarketDocument.[]
12	[0..*]	MarketDocument Related_MarketDocument	The identification of an electronic document that is related to an electronic document header. Association Based On: CRAC contextual model::CRAC_MarketDocument.[] ----- CRAC contextual model::MarketDocument.Related_MarketDocument[0..*]
15	[0..*]	TimeSeries TimeSeries	The time series that is associated with an electronic document. Association Based On: CRAC contextual model::CRAC_MarketDocument.[] ----- CRAC contextual model::TimeSeries.TimeSeries[0..*]
16	[0..*]	Reason Reason	The Reason associated with the electronic document header providing different motivations for the creation of the document. Association Based On: CRAC contextual model::Reason.Reason[0..*] ----- CRAC contextual model::CRAC_MarketDocument.[]

168

### 169 2.2.3.2 AdditionalConstraint\_RegisteredResource

170 This is a resource contributing to the relevant additional constraint.

171 Table 5 shows all attributes of AdditionalConstraint\_RegisteredResource.

172 **Table 5 - Attributes of CRAC assembly**  
173 **model::AdditionalConstraint\_RegisteredResource**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ResourceID_String	The unique identification of a resource.
1	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.
2	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- The identification of the domain linked by the registered resource.
3	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- The identification of the domain linked by the registered resource.
4	[0..1]	marketObjectStatus.status Status_String	The coded application mode. --- The status of the registered resource, e.g. connected, disconnected, outage, ...

174

175 Table 6 shows all association ends of AdditionalConstraint\_RegisteredResource with other  
176 classes.

177  
178

**Table 6 - Association ends of CRAC assembly  
model::AdditionalConstraint\_RegisteredResource with other classes**

Order	mult.	Class name / Role	Description
5	[0..*]	RegisteredResource_Reason Reason	The reason information associated with a RegisteredResource providing motivation information. Association Based On: CRAC contextual model::RegisteredResource_Reason.Reason[0..*] ----- CRAC contextual model::AdditionalConstraint_RegisteredResource.[]

179

### 180 2.2.3.3 AdditionalConstraint\_Series

181 An additional constraint to be taken into account in the load flow study

182 Table 7 shows all attributes of AdditionalConstraint\_Series.

183 **Table 7 - Attributes of CRAC assembly model::AdditionalConstraint\_Series**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of the additional constraint.
1	[1..1]	businessType BusinessKind_String	The nature of the additional constraint
2	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.
4	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- The Domain identifying where energy of the External Constraint is going to.
5	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- The Domain identifying where the energy of the External Constraint comes from.
6	[0..1]	measurement_Unit.name MeasurementUnitKind_String	The identification of the formal code for a measurement unit (UN/ECE Recommendation 20). --- The unit of measure of the External Constraint quantity
7	[0..1]	quantity.quantity Decimal	The quantity value of the additional constraint --- The value of the External Constraint

184

185 Table 8 shows all association ends of AdditionalConstraint\_Series with other classes.

186 **Table 8 - Association ends of CRAC assembly model::AdditionalConstraint\_Series with  
187 other classes**

Order	mult.	Class name / Role	Description
3	[0..*]	Party_MarketParticipant Party_MarketParticipant	The identification of a market participant associated with a TimeSeries. Association Based On: CRAC contextual model::Party_MarketParticipant.Party_MarketParticipant[0..*] ----- CRAC contextual model::AdditionalConstraint_Series.[]

Order	mult.	Class name / Role	Description
8	[0..*]	AdditionalConstraint_RegisteredResource RegisteredResource	The identification of a resource associated with a TimeSeries. Association Based On: CRAC contextual model::AdditionalConstraint_RegisteredResource.RegisteredResource[0..*] ----- CRAC contextual model::AdditionalConstraint_Series.[]
9	[0..*]	Series_Reason Reason	The reason information associated with a TimeSeries providing motivation information. Association Based On: CRAC contextual model::Series_Reason.Reason[0..*] ----- CRAC contextual model::AdditionalConstraint_Series.[]

188

#### 189 2.2.3.4 Analog

190 Analog represents an analog Measurement.

191 Analog provides the analog measurements monitored for one specific  
192 Monitored\_RegisteredResource.

193 Table 9 shows all attributes of Analog.

194

**Table 9 - Attributes of CRAC assembly model::Analog**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	measurementType AnalogType_String	Specifies the type of measurement. For example, it specifies if the measurement represents flow, maximum flow, reference flow, etc.
1	[1..1]	unitSymbol UnitSymbol	The unit of measure of the measured quantity.
2	[0..1]	positiveFlowIn ESMPBoolean_String	If true then this measurement is an active power, reactive power or current with the convention that a positive value measured at the Terminal means power is flowing into the related Monitored_RegisteredResource depending on the In_AggregateNode and the Out_AggregateNode.
3	[1..1]	analogValues.value ESMP_Float	The value to supervise. --- Measurement to which this value is connected.
4	[0..1]	analogValues.description String	The description of the measurementType and its associated value. --- Measurement to which this value is connected.

195

#### 196 2.2.3.5 Contingency\_RegisteredResource

197 This is one of the network elements which are in outage for the studied contingency defined in  
198 the Series.

199 Table 10 shows all attributes of Contingency\_RegisteredResource.

200

**Table 10 - Attributes of CRAC assembly model::Contingency\_RegisteredResource**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ResourceID_String	The unique identification of the resource in outage.
1	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.

Order	mult.	Attribute name / Attribute type	Description
2	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- The area where an extremity of the resource is located. This is used to provide orientation information.
3	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- The area where an extremity of the resource is located. This is used to provide orientation information.
4	[0..1]	marketObjectStatus.status Status_String	The coded condition or position of an object with regard to its standing. --- The status of the registered resource, e.g. connected, disconnected, outage, ...

201

202 Table 11 shows all association ends of Contingency\_RegisteredResource with other classes.

203

**Table 11 - Association ends of CRAC assembly model::Contingency\_RegisteredResource with other classes**

204

Order	mult.	Class name / Role	Description
5	[0..*]	Analog Measurements	The power system resource that contains the measurement. Association Based On: CRAC contextual model::Analog.Measurements[0..*] ----- CRAC contextual model::Contingency_RegisteredResource.[]
6	[0..*]	RegisteredResource_Reason Reason	The reason information associated with a RegisteredResource providing motivation information. Association Based On: CRAC contextual model::RegisteredResource_Reason.Reason[0..*] ----- CRAC contextual model::Contingency_RegisteredResource.[]

205

### 206 2.2.3.6 Contingency\_Series

207 A contingency defined by a set of elements on which a modification is applied in order to  
208 simulate a defect.

209 Table 12 shows all attributes of Contingency\_Series.

**Table 12 - Attributes of CRAC assembly model::Contingency\_Series**

210

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of the time series.
1	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.

211

212 Table 13 shows all association ends of Contingency\_Series with other classes.

213 **Table 13 - Association ends of CRAC assembly model::Contingency\_Series with other**  
214 **classes**

Order	mult.	Class name / Role	Description
2	[0..*]	Party_MarketParticipant Party_MarketParticipant	The identification of a market participant associated with a TimeSeries. Association Based On: CRAC contextual model::Party_MarketParticipant.Party_MarketParticipant[0..*] ----- CRAC contextual model::Contingency_Series.[]
3	[0..*]	Contingency_RegisteredResource RegisteredResource	The identification of a resource associated with a TimeSeries. Association Based On: CRAC contextual model::Contingency_RegisteredResource.RegisteredResource[0..*] ----- CRAC contextual model::Contingency_Series.[]
4	[0..*]	Series_Reason Reason	The reason information associated with a TimeSeries providing motivation information. Association Based On: CRAC contextual model::Series_Reason.Reason[0..*] ----- CRAC contextual model::Contingency_Series.[]

215

### 216 2.2.3.7 MarketDocument

217 An electronic document containing the information necessary to satisfy the requirements of a  
218 given business process.

219 Table 14 shows all attributes of MarketDocument.

220 **Table 14 - Attributes of CRAC assembly model::MarketDocument**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	The identification of the version that distinguishes one evolution of a document from another.
1	[1..1]	revisionNumber ESMPVersion_String	The identification of the version that distinguishes one evolution of a document from another.

221

### 222 2.2.3.8 Monitored\_RegisteredResource

223 This is a network element to be monitored during the load flow study after applying the  
224 contingencies described in the Series. analog measurements are monitored for this resource to  
225 identify the network constraints.

226 Table 15 shows all attributes of Monitored\_RegisteredResource.

227 **Table 15 - Attributes of CRAC assembly model::Monitored\_RegisteredResource**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ResourceID_String	The unique identification of a resource.
1	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.

Order	mult.	Attribute name / Attribute type	Description
2	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- The area where the flow measurement enters for the monitored resource.
3	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- The control area connected to the monitored resource where the flow measurement comes out.
4	[0..1]	in_AggregateNode.mRID ResourceID_String	The unique identification of an AggregateNode. In the ESMP context, the "model authority" is defined as an authorized issuing office that provides an agreed identification coding scheme for market participant, domain, measurement point, resources (generator, lines, substations, etc.) identification. Master resource identifier issued by a model authority. The mRID is unique within an exchange context. Global uniqueness is easily achieved by using a UUID, as specified in RFC 4122, for the mRID. The use of UUID is strongly recommended. For CIMXML data files in RDF syntax conforming to IEC 61970-552 Edition 1, the mRID is mapped to rdf:ID or rdf:about attributes that identify CIM object elements. --- The identification of the aggregate node that is linked to the registered resource.
5	[0..1]	out_AggregateNode.mRID ResourceID_String	The unique identification of an AggregateNode. In the ESMP context, the "model authority" is defined as an authorized issuing office that provides an agreed identification coding scheme for market participant, domain, measurement point, resources (generator, lines, substations, etc.) identification. Master resource identifier issued by a model authority. The mRID is unique within an exchange context. Global uniqueness is easily achieved by using a UUID, as specified in RFC 4122, for the mRID. The use of UUID is strongly recommended. For CIMXML data files in RDF syntax conforming to IEC 61970-552 Edition 1, the mRID is mapped to rdf:ID or rdf:about attributes that identify CIM object elements. --- The identification of the aggregate node that is linked to the registered resource.

228

229 Table 16 shows all association ends of Monitored\_RegisteredResource with other classes.

230 **Table 16 - Association ends of CRAC assembly model::Monitored\_RegisteredResource**  
231 **with other classes**

Order	mult.	Class name / Role	Description
6	[0..*]	Analog Measurements	The monitored measurements of the monitored network element. Association Based On: CRAC contextual model::Analog.Measurements[0..*] ----- CRAC contextual model::Monitored_RegisteredResource.[]
7	[0..*]	RegisteredResource_Reason Reason	The reason information associated with a RegisteredResource providing motivation information. Association Based On: CRAC contextual model::RegisteredResource_Reason.Reason[0..*] ----- CRAC contextual model::Monitored_RegisteredResource.[]

232

### 233 2.2.3.9 Monitored\_Series

234 A situation to be monitored defined by a set of elements on which a coupled monitoring must  
235 be performed.

236 Table 17 shows all attributes of Monitored\_Series.

237

**Table 17 - Attributes of CRAC assembly model::Monitored\_Series**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of the time series. In the ESMP context, the "model authority" is defined as a party (originator of the exchange) that provides a unique identification in the context of a business exchange such as time series identification, bid identification, ... Master resource identifier issued by a model authority. The mRID is globally unique within an exchange context. Global uniqueness is easily achieved by using a UUID for the mRID. It is strongly recommended to do this. For CIMXML data files in RDF syntax, the mRID is mapped to rdf:ID or rdf:about attributes that identify CIM object elements.
1	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.

238

239 Table 18 shows all association ends of Monitored\_Series with other classes.

**Table 18 - Association ends of CRAC assembly model::Monitored\_Series with other classes**

240

241

Order	mult.	Class name / Role	Description
2	[0..*]	Party_MarketParticipant Party_MarketParticipant	The identification of a market participant associated with a TimeSeries. Association Based On: CRAC contextual model::Party_MarketParticipant.Party_MarketParticipant[0..*] ----- CRAC contextual model::Monitored_Series.[]
3	[0..*]	Monitored_RegisteredResource RegisteredResource	The identification of a resource associated with a TimeSeries. Association Based On: CRAC contextual model::Monitored_RegisteredResource.RegisteredResource[0..*] ----- CRAC contextual model::Monitored_Series.[]
4	[0..*]	Series_Reason Reason	The reason information associated with a TimeSeries providing motivation information. Association Based On: CRAC contextual model::Monitored_Series.[] ----- CRAC contextual model::Series_Reason.Reason[0..*]

242

### 243 2.2.3.10 Party\_MarketParticipant

244 The identification of the limiting TSOs for the given contingency, obtained after the network  
245 studies. It can also identify the TSO that provides the Series.

246 Table 19 shows all attributes of Party\_MarketParticipant.

**Table 19 - Attributes of CRAC assembly model::Party\_MarketParticipant**

247

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID PartyID_String	The identification of the limiting TSO associated to the TimeSeries.

248

### 249 2.2.3.11 Point

250 The identification of the values being addressed within a specific interval of time.

251 Table 20 shows all attributes of Point.

252 **Table 20 - Attributes of CRAC assembly model::Point**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	position Position_Integer	A sequential value representing the relative position within a given time interval.

253

254 Table 21 shows all association ends of Point with other classes.

255 **Table 21 - Association ends of CRAC assembly model::Point with other classes**

Order	mult.	Class name / Role	Description
1	[1..*]	Series Series	TheTimeSeries provides additional information related to a Position within a given time interval. Association Based On: CRAC contextual model::Series.Series[1..*] ----- CRAC contextual model::Point.[]
2	[0..*]	Reason Reason	The Reason information associated with a Point providing motivation information. Association Based On: CRAC contextual model::Point.[] ----- CRAC contextual model::Reason.Reason[0..*]

256

### 257 2.2.3.12 Reason

258 The coded motivation of an act.

259 Table 22 shows all attributes of Reason.

260 **Table 22 - Attributes of CRAC assembly model::Reason**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	code ReasonCode_String	The motivation of an act in coded form.
1	[0..1]	text ReasonText_String	The textual explanation corresponding to the reason code.

261

### 262 2.2.3.13 RegisteredResource\_Reason

263 Comment related to a registered resource

264 Table 23 shows all attributes of RegisteredResource\_Reason.

265 **Table 23 - Attributes of CRAC assembly model::RegisteredResource\_Reason**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	code ReasonCode_String	The motivation of an act in coded form.
1	[0..1]	text ReasonText_String	The textual explanation corresponding to the reason code.

266

267 **2.2.3.14 RemedialAction\_RegisteredResource**

268 This is one of the network element on which remedial action are carried out to improve the  
269 constraint situation. Those elements are used to remedy to constraints induced by the constraint  
270 situation.

271 Table 24 shows all attributes of RemedialAction\_RegisteredResource.

272 **Table 24 - Attributes of CRAC assembly model::RemedialAction\_RegisteredResource**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ResourceID_String	The unique identification of the remedial registered resource
1	[0..1]	name String	The name is any free human readable and possibly non unique text naming the object.
2	[0..1]	pSRType.psrType PsrType_String	The coded type of the registered resource. --- The coded type of the associated resource.
3	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- The area where an extremity of the resource is located. This is used to provide orientation information.
4	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- The area where an extremity of the resource is located. This is used to provide orientation information.
5	[0..1]	in_AggregateNode.mRID MeasurementPointID_String	The unique identification of an AggregateNode. In the ESMP context, the "model authority" is defined as an authorized issuing office that provides an agreed identification coding scheme for market participant, domain, measurement point, resources (generator, lines, substations, etc.) identification. Master resource identifier issued by a model authority. The mRID is unique within an exchange context. Global uniqueness is easily achieved by using a UUID, as specified in RFC 4122, for the mRID. The use of UUID is strongly recommended. For CIMXML data files in RDF syntax conforming to IEC 61970-552 Edition 1, the mRID is mapped to rdf:ID or rdf:about attributes that identify CIM object elements. --- The identification of the aggregate node that is linked to the registered resource.
6	[0..1]	out_AggregateNode.mRID MeasurementPointID_String	The unique identification of an AggregateNode. In the ESMP context, the "model authority" is defined as an authorized issuing office that provides an agreed identification coding scheme for market participant, domain, measurement point, resources (generator, lines, substations, etc.) identification. Master resource identifier issued by a model authority. The mRID is unique within an exchange context. Global uniqueness is easily achieved by using a UUID, as specified in RFC 4122, for the mRID. The use of UUID is strongly recommended. For CIMXML data files in RDF syntax conforming to IEC 61970-552 Edition 1, the mRID is mapped to rdf:ID or rdf:about attributes that identify CIM object elements. --- The identification of the aggregate node that is linked to the registered resource.
7	[1..1]	marketObjectStatus.status Status_String	The coded application mode. --- The action to be realized on a registered resource like open/close/stop or the nature of the capacity values like absolute/Relative in case the resource capacity element is used.
8	[0..1]	resourceCapacity.maximumCapacity Decimal	The maximum variation or target value of tap, generation or load
9	[0..1]	resourceCapacity.minimumCapacity Decimal	The minimum variation or target value of tap, generation or load

Order	mult.	Attribute name / Attribute type	Description
10	[0..1]	resourceCapacity.defaultCapacity Decimal	The variation or target value of tap, generation or load
11	[0..1]	resourceCapacity.unitSymbol UnitSymbol	Unit selection for the capacity values.

273

274 Table 25 shows all association ends of RemedialAction\_RegisteredResource with other  
275 classes.

276

**Table 25 - Association ends of CRAC assembly  
model::RemedialAction\_RegisteredResource with other classes**

277

Order	mult.	Class name / Role	Description
12	[0..*]	Analog Measurements	The power system resource that contains the measurement. Association Based On: CRAC contextual model::Analog.Measurements[0..*] ----- CRAC contextual model::RemedialAction_RegisteredResource.[]
13	[0..*]	RegisteredResource_Reason Reason	The reason information associated with a RegisteredResource providing motivation information. Association Based On: CRAC contextual model::RegisteredResource_Reason.Reason[0..*] ----- CRAC contextual model::RemedialAction_RegisteredResource.[]

278

### 279 2.2.3.15 RemedialAction\_Series

280 A set of remedial actions provided to relieve a network constraint after applying the  
281 contingencies provided in the Series or free to use by the capacity calculator.

282 Table 26 shows all attributes of RemedialAction\_Series.

**Table 26 - Attributes of CRAC assembly model::RemedialAction\_Series**

283

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of the set of remedial action.
1	[0..1]	name String	The free human readable name of the set of remedial actions.
2	[0..1]	businessType BusinessKind_String	The nature of the set of remedial actions.
3	[0..1]	applicationMode_MarketObjectStatus.status Status_String	The coded application mode. --- The condition of use of the remedial action. It can be preventive, curative or automatic.
4	[0..1]	availability_MarketObjectStatus.status Status_String	The coded application mode. --- The status of an object associated with a TimeSeries.
6	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- In case of Bilateral Exchange Remedial Action, the area where the energy is going to
7	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- In case of Bilateral Exchange Remedial Action, the area where the energy comes from

Order	mult.	Attribute name / Attribute type	Description
8	[0..1]	measurement_Unit.name MeasurementUnitKind_String	The identification of the formal code for a measurement unit (UN/ECE Recommendation 20). --- The unit of measure associated with the quantity if a Bilateral Exchange remedial action is described, or associated to the capacity values if the resource capacity element is used.
9	[0..1]	quantity.quantity Decimal	The quantity value of the additional constraint --- The value of a bilateral exchange used as remedial action
10	[0..1]	price.amount Amount_Decimal	A number of monetary units specified in a unit of currency. --- The price information associated to a TimeSeries.

284

285 Table 27 shows all association ends of RemedialAction\_Series with other classes.

286 **Table 27 - Association ends of CRAC assembly model::RemedialAction\_Series with**  
287 **other classes**

Order	mult.	Class name / Role	Description
5	[0..*]	Party_MarketParticipant Party_MarketParticipant	The identification of a market participant associated with a TimeSeries. Association Based On: CRAC contextual model::Party_MarketParticipant.Party_MarketParticipant[0..*] ----- CRAC contextual model::RemedialAction_Series.[]
11	[0..*]	RemedialAction_RegisteredResource RegisteredResource	The registered resources on which remedial actions are carried out Association Based On: CRAC contextual model::RemedialAction_RegisteredResource.RegisteredResource[0..*] ----- CRAC contextual model::RemedialAction_Series.[]
12	[0..*]	Shared_Domain Shared_Domain	The area of the monitored network elements where the remedial action series can be used in case of a network security constraint. Association Based On: CRAC contextual model::Shared_Domain.Shared_Domain[0..*] ----- CRAC contextual model::RemedialAction_Series.[]
13	[0..*]	Series_Reason Reason	The reason information associated with a TimeSeries providing motivation information. Association Based On: CRAC contextual model::Series_Reason.Reason[0..*] ----- CRAC contextual model::RemedialAction_Series.[]

288

### 289 2.2.3.16 Series

290 The set of contingency network elements, monitored network elements, remedial actions and  
291 additional constraints enabling to create a contingency.

292 Table 28 shows all attributes of Series.

293 **Table 28 - Attributes of CRAC assembly model::Series**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of a list of contingencies, a list of monitored registered resources or remedial actions.

Order	mult.	Attribute name / Attribute type	Description
1	[1..1]	businessType BusinessKind_String	The identification of the nature of the Series.
2	[0..1]	name String	The free human readable name of the Series.
4	[0..1]	optimization_MarketObjectStatus.status Status_String	The coded application mode. --- The status of an object associated with a TimeSeries.

294

295 Table 29 shows all association ends of Series with other classes.

296 **Table 29 - Association ends of CRAC assembly model::Series with other classes**

Order	mult.	Class name / Role	Description
3	[0..*]	Party_MarketParticipant Party_MarketParticipant	The identification of the limiting TSOs for the given network constraint situation, obtained after the network studies. It can also identify the TSO that provides the constraint_series. Association Based On: CRAC contextual model::Series.[] ----- CRAC contextual model::Party_MarketParticipant.Party_MarketParticipant[0..*]
5	[0..*]	AdditionalConstraint_Series AdditionalConstraint_Series	An External Constraint to be taken (or taken) into account in the network studies associated to a Constraint Series Association Based On: CRAC contextual model::AdditionalConstraint_Series.AdditionalConstraint_Series[0..*] ----- CRAC contextual model::Series.[]
6	[0..*]	Contingency_Series Contingency_Series	Association Based On: CRAC contextual model::Contingency_Series.Contingency_Series[0..*] ----- CRAC contextual model::Series.[]
7	[0..*]	Monitored_Series Monitored_Series	Association Based On: CRAC contextual model::Monitored_Series.Monitored_Series[0..*] ----- CRAC contextual model::Series.[]
8	[0..*]	RemedialAction_Series RemedialAction_Series	A set of remedial actions provided for a given Constraint Situation or free to use by the capacity calculator if no outage and monitored elements are provided in the constraint series. Association Based On: CRAC contextual model::RemedialAction_Series.RemedialAction_Series[0..*] ----- CRAC contextual model::Series.[]
9	[0..*]	Reason Reason	The reason information associated with a Series providing motivation information. Association Based On: CRAC contextual model::Series.[] ----- CRAC contextual model::Reason.Reason[0..*]

297

### 298 2.2.3.17 Series\_Period

299 The identification of the period of time corresponding to a given time interval and resolution.

300 Table 30 shows all attributes of Series\_Period.

301

**Table 30 - Attributes of CRAC assembly model::Series\_Period**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	timeInterval ESMP_DateTimeInterval	The start and end time of the period.
1	[1..1]	resolution Duration	The definition of the number of units of time that compose an individual step within a period.

302

303 Table 31 shows all association ends of Series\_Period with other classes.

304 **Table 31 - Association ends of CRAC assembly model::Series\_Period with other classes**

Order	mult.	Class name / Role	Description
2	[1..*]	Point Point	The Point information associated with a given Series_Period.within a TimeSeries. Association Based On: CRAC contextual model::Series_Period.[] ----- CRAC contextual model::Point.Point[1..*]

305

### 306 2.2.3.18 Series\_Reason

307 Comment related to a Series

308 Table 32 shows all attributes of Series\_Reason.

309 **Table 32 - Attributes of CRAC assembly model::Series\_Reason**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	code ReasonCode_String	The motivation of an act in coded form.
1	[0..1]	text ReasonText_String	The textual explanation corresponding to the reason code.

310

### 311 2.2.3.19 Shared\_Domain

312 The areas allowed to use the remedial action.

313 Table 33 shows all attributes of Shared\_Domain.

314 **Table 33 - Attributes of CRAC assembly model::Shared\_Domain**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID AreaID_String	The unique identification of the domain.

315

### 316 2.2.3.20 TimeSeries

317 A set of time-ordered Series.

318 Table 34 shows all attributes of TimeSeries.

319

**Table 34 - Attributes of CRAC assembly model::TimeSeries**

Order	mult.	Attribute name / Attribute type	Description
0	[1..1]	mRID ID_String	A unique identification of the time series.
1	[1..1]	businessType BusinessKind_String	The identification of the nature of the time series.
2	[1..1]	curveType CurveType_String	The identification of the coded representation of the type of curve being described.
3	[0..1]	in_Domain.mRID AreaID_String	The unique identification of the domain. --- In case of NTC determination process, this is the area of the related oriented border study in which the energy flows into.
4	[0..1]	out_Domain.mRID AreaID_String	The unique identification of the domain. --- In case of NTC determination process, this is the area of the related oriented border study in which the energy comes from.
5	[0..1]	currency_Unit.name CurrencyCode_String	The identification of the formal code for a currency (ISO 4217). --- The currency associated with a TimeSeries.
6	[0..1]	price_Measurement_Unit.name MeasurementUnitKind_String	The identification of the formal code for a measurement unit (UN/ECE Recommendation 20). --- The unit of measure associated with the quantities in a TimeSeries.

320

321 Table 35 shows all association ends of TimeSeries with other classes.

**Table 35 - Association ends of CRAC assembly model::TimeSeries with other classes**

Order	mult.	Class name / Role	Description
7	[1..*]	Series_Period Period	The time interval and resolution for a period associated with a TimeSeries. Association Based On: CRAC contextual model::TimeSeries.[] ----- CRAC contextual model::Series_Period.Period[1..*]
8	[0..*]	Reason Reason	The reason information associated with a TimeSeries providing motivation information. Association Based On: CRAC contextual model::TimeSeries.[] ----- CRAC contextual model::Reason.Reason[0..*]

323

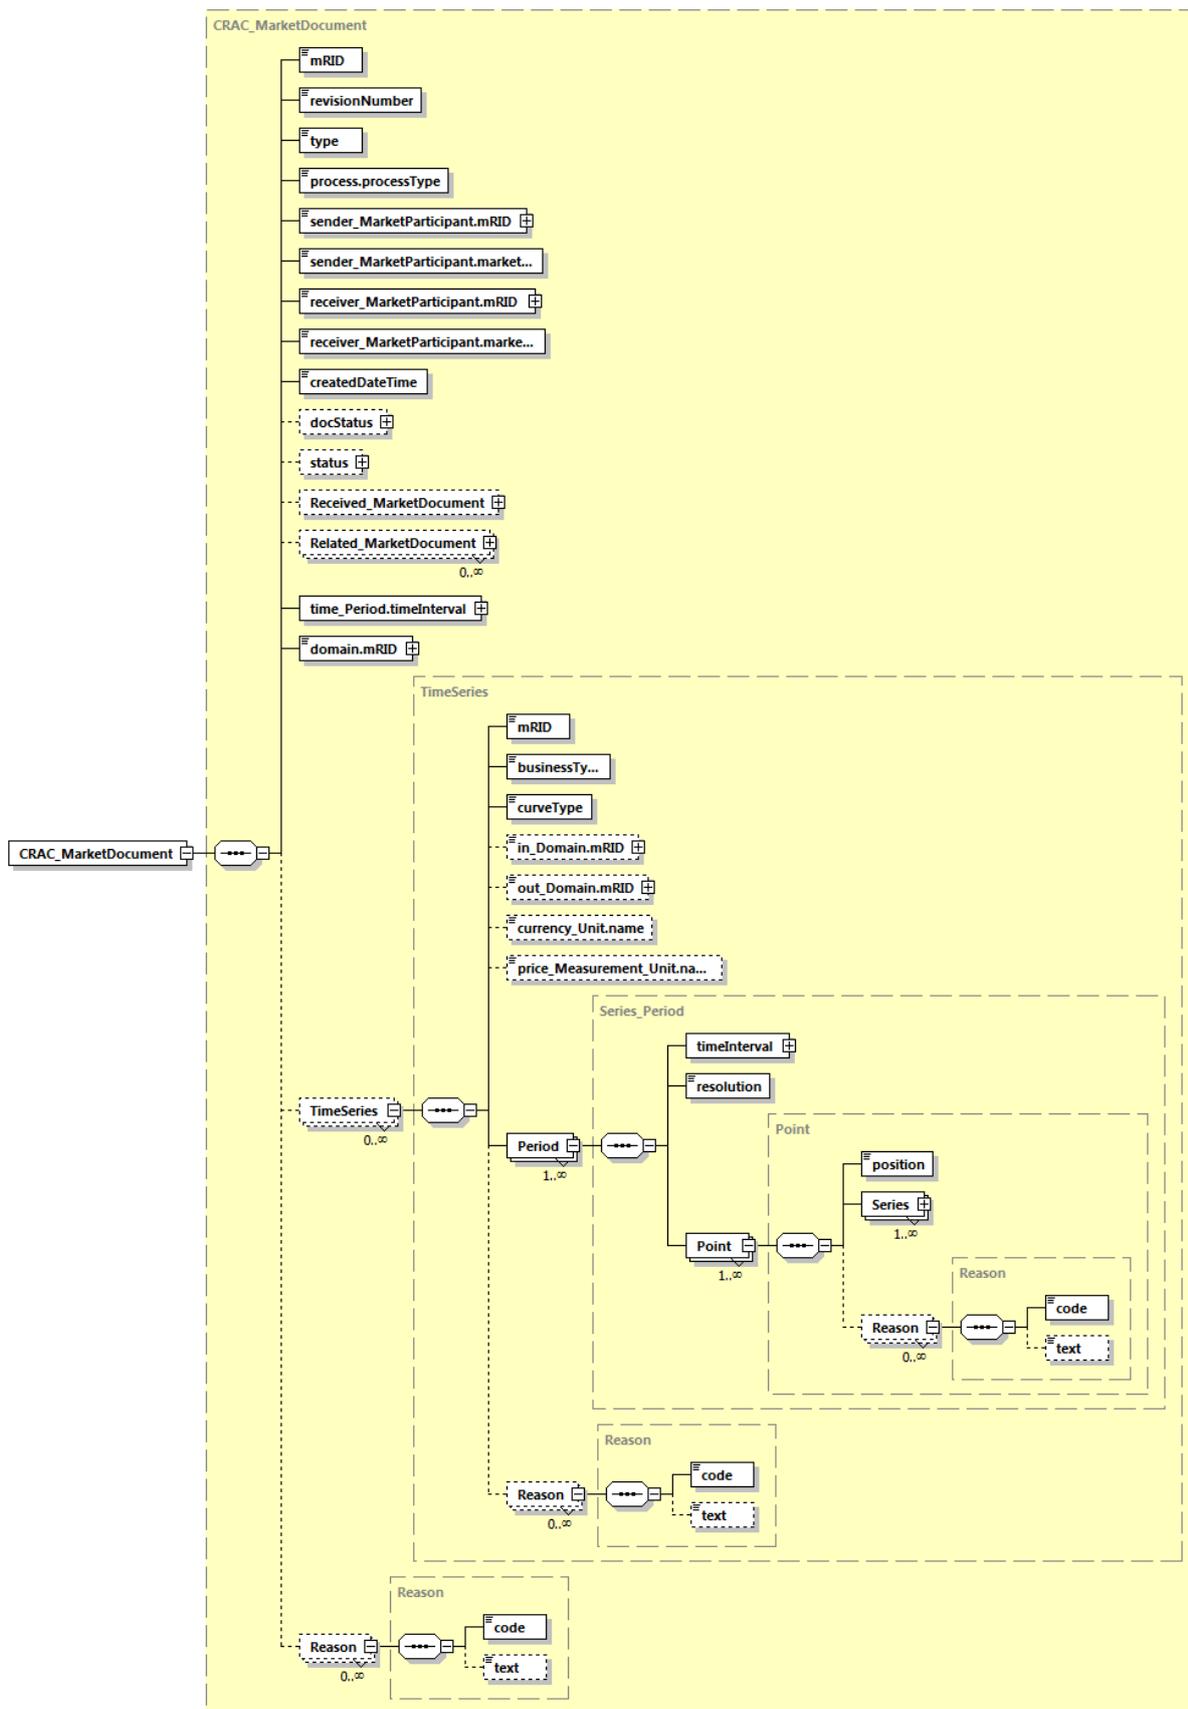

#### 324 2.2.4 Datatypes

325 The list of datatypes used for the CRAC assembly model is as follows:

- 326 • Action\_Status compound
- 327 • ESMP\_DateTimeInterval compound
- 328 • Amount\_Decimal datatype
- 329 • AnalogType\_String datatype, codelist AnalogTypeList
- 330 • AreaID\_String datatype, codelist CodingSchemeTypeList
- 331 • BusinessKind\_String datatype, codelist BusinessTypeList
- 332 • CurrencyCode\_String datatype, codelist CurrencyTypeList
- 333 • CurveType\_String datatype, codelist CurveTypeList
- 334 • ESMP\_DateTime datatype
- 335 • ESMP\_Float datatype
- 336 • ESMPBoolean\_String datatype, codelist IndicatorTypeList
- 337 • ESMPVersion\_String datatype

- 338 • ID\_String datatype
- 339 • MarketRoleKind\_String datatype, codelist RoleTypeList
- 340 • MeasurementPointID\_String datatype, codelist CodingSchemeTypeList
- 341 • MeasurementUnitKind\_String datatype, codelist UnitOfMeasureTypeList
- 342 • MessageKind\_String datatype, codelist MessageTypeList
- 343 • PartyID\_String datatype, codelist CodingSchemeTypeList
- 344 • Position\_Integer datatype
- 345 • ProcessKind\_String datatype, codelist ProcessTypeList
- 346 • PsrType\_String datatype, codelist AssetTypeList
- 347 • ReasonCode\_String datatype, codelist ReasonCodeTypeList
- 348 • ReasonText\_String datatype
- 349 • ResourceID\_String datatype, codelist CodingSchemeTypeList
- 350 • Status\_String datatype, codelist StatusTypeList
- 351 • UnitSymbol datatype, codelist UnitSymbol
- 352 • YMDHM\_DateTime datatype
- 353
- 354
