64 **1. Objective**

65 The purpose of this document is to provide the contextual and assembly UML models and the  
66 schema of the ReserveAllocationResult\_MarketDocument.

67 The schema of the ReserveAllocationResult\_MarketDocument could be used in various  
68 business processes.

69 It is not the purpose of this document to describe all the use cases, sequence diagrams,  
70 business processes, etc. for which this schema is to be used.

71 This document shall only be referenced in an implementation guide of a specific business  
72 process. The content of the business process implementation guide shall be as follows:

- 73 • Description of the business process;
- 74 • Use case of the business process;
- 75 • Sequence diagrams of the business process;
- 76 • List of the schema (XSD) to be used in the business process and versions of the  
77 schema;
- 78 • For each schema, dependency tables providing the necessary information for the  
79 generation of the XML instances, i.e. when the optional attributes are to be used, which  
80 codes from which ENTSO-E codelist are to be used.
