

**Report related to Art. 9.1 of EU Regulation 543/2013 on *Transmission infrastructure***

As requested by Article 9.1 of Regulation 543/2013, this report includes the list of network development projects in the national transmission grid with an estimated impact (MW) on the interconnection capacity between bidding zones for the following three years. This information refers only to projects with a relevant effect on transfer capability between bidding zones (including technical profiles). A relevant effect is considered to be an effect that equals or exceeds 100 MW at least during one market time unit.

The following table lists the planned projects with a completion date expected in the next three years (2015-17).

Identification of asset	Location (zone from)	Location (zone to)	type	Estimated Impact (*) [MW]	Completion date	Comment
XX kV Node A - Node B	Zone A	Zone B	AC/DC link	XX	Year (optional early/mid/late)	optional
	Zone B	Zone A	AC/DC link	XX		optional
