Key Milestones for MoP v3r3

A joint Task Force consisting of representatives from Balancing Platforms, WG MIT and ENTSO-E secretariat drafted the amendments to the MoP, submitted the amended MoP for the approval of the MC and opened it for Public Consultation:

Amendments to existing publications

MoP v3r3 includes the following updates (compared to v3r2):

- Definitions in DDD extended with European platforms, CBMP, imbalance netting, activation purposes, mFRR direct and scheduled activations
- Local balancing products
- Distinguish mFRR scheduled & direct activations; TR 17.1.f, EB GL 12.3.e, EB GL 12.3.b amended
- Balancing energy price methodology; TR 17.1.f amended
- Activation purpose methodology; EB GL 12.3.b amended
- Imbalance price methodology; TR 17.1.g amended
- TR 17.1.b&c merged and EB GL 12.3.f amended accordingly
- Algorithm publication for IN/IGCC: EB GL 12.3.k amended

Further details provided in modification histories of DDD, BRS and IGs.

Incorporation of SO GL publications in MoP v3r3

Reminder: SO GL articles 183 through 190 set the scope for the transparency publications.

With the incorporation into MoP v3r3, the following modifications were introduced:

- Structured XML publication introduced for **185.4 Results of Criteria Application**
- Existing structured XML publication simplified for **187.2 FCR Total Capacity**: Single values for the entire year, publication of contracted capacity deprecated
- Structured XML publication introduced for **188.3 FRR Capacity Forecast**
- Structured XML publication introduced for **189.2 RR Capacity Forecast**
- Publications for 188.3, 188.4, 189.2 and 189.3 streamlined: Same set of attributes (forecast versus min/average/max actuals), all with quarterly resolution
- Existing structured XML publication simplified for **190.1 Sharing of RR and FRR**.
- Structured XML publication introduced for **190.2 Sharing of FCR**
- Capacity shared rather than transferred from connecting to acquiring TSO.
- Structured XML publication introduced for **190.3 Exchanged Reserve Capacity**
- Actual exchanges rather than agreements published, as reserve capacity surplus or deficit.

Further details provided in modification histories of DDD, BRS and IG.
