

- **Emerging technologies** (Title VI of NC RfG)
  - 18 NRAs participating in coordination (4 representing MS's ministries or regional regulators)
  - NRAs/MSs received applications for Stirling engine PGM technology
  - The majority of NRAs/MSs received:
    - more than one request from manufacturers,
    - an application from the primary producer of Stirling engines
    - an application from manufacturers of specific PGMs which used the Stirling engine technology from the primary producer
  - A need for avoiding double counting in the monitoring of the sales of emerging technology PGMs has been identified
  - ACER provided an NRA information sharing platform to facilitate NRAs' coordination and information sharing

### Next steps

- NRAs will aim at preparing a common approach to granting emerging technology statuses
- NRAs agreed to:
  - Coordinate based on ACER two-pager
