CWE NRAs' view on transparency in CWE FBMC

17th MESC Meeting (Brussels)
2 July 2019

Transparency

- **CWE NRAs** acknowledge **progress and developments on transparency made since 2015**, with significant efforts engaged since 2 years, **and** welcome **the active "monitoring" role of market parties**.

    – On the incompletely fulfilled points, CWE NRAs are following and pushing for development in close interaction with TSOs.

- **CWE NRAs urge TSOs to ensure quality of already provided data** that has to be complete, consistent and up-to-date.

- CWE NRAs welcome timely reporting on transparency issues from MPs.

- **CWE NRAs acknowledge CCG meetings and ad-hoc calls as the right framework for communication between TSOs and MPs**.

- Publication of additional information or datasets has to be carefully considered and aligned with transparency framework of Core CCR.

Overview of transparency requirements in CWE NRAs' 2015 and 2018 CPP

NRAs' requests	Description	NRAs' assessment
2015 CPP		
Publication of fixed, anonymised CBCOs and non redundant CBs	-	Completed, industrialised publication of not anonymized CBCOs under development
Provision of "typical" FB matrices	-	Completed
Publication of simplified SGM	-	Completed
Aggregated D2CF publication	-	Completed
2018 CPP		
Full breakdown of RAM	Inclusion of AMR in RAM breakdown	Completed
Justification of minRAM exclusions	-	Detailed monitoring/reporting framework under development
PTDF and RAM values before LTA inclusion	Publication of virgin domain in utility tool	Under development
Up-to-date SGM	-	Completed
RefProg on non-CWE borders	Inclusion of RefProg from bordering TSOs	Completed
Timely publication of future outages	Publication of outages in D-2 in the utility tool	Information available on ENTSO-E transparency platform
