Core CCR TSOs' methodology for splitting long-term cross-zonal capacity in accordance with article 16 of the Commission Regulation (EU) 2016/1719

Market Stakeholder Committee Meeting

Brussels - CEER

11 March 2020

Way forward for Core SR methodology

- Last Core NRA received Proposal from national TSO on 19/9/2019
- In the middle of March 2020 Core NRAs will send Request for amendment (RFA) which will contain 2 issues:
 - six months after the approval of the Core LTCC methodology, Core TSOs shall submit a review on possible adjustments of the SR methodology (in relation to the approved Core LTCC methodology)
 - two years after the implementation of the SR methodology, Core TSOs shall submit a report on the efficiency of the used approach and its practical fulfilment of the requirements of Article 16(2) of FCA GL
- Core NRAs are of the opinion that the alternative approach in which the split is influenced by bids is very interesting proposal, however they consider it to be out of the scope of the Core SR RfA
- Implementing such ideas requires a broader assessment of existing FCA GL methodologies and thus cannot be implemented only in the Core SR
- Further discussion on this will be held among all EU NRAs and in cooperation with all EU TSOs
