# Annex 19 for border Portugal - Spain

- **Specific articles for IPE border:**

- There are several specific provisions on IPE border, mainly due to the specific regional platform managed by OMIP. This is a transitory platform until SAP is established under FCA Guideline.
- This annex is already present in the current version of EU HAR. Few modifications have been made in the proposal consulted:
  - In article 2, point 4, it has been added that the standard timeframes of products are yearly and quarterly.
  - In article 2, point 6, it has been added a provision that limits the amount of any return to the maximum amount of held LTRs.
