TYNDP 2014 – next steps

TYNDP 2014 – web-consultation ends 20 September

Reliable. Sustainable. Connected.

Cooperating for reliable operation, optimal management and sound technical evolution of the European electricity transmission system.

ENTSO-E Consultations

ENTSO-E holds public consultations, at an early stage and in an open and transparent manner, to collect the valuable feedback of interested stakeholders on different documents.

- > 14 July-19 September: Public Consultation on Adequacy Methodology
ENTSO-E launches a 9 week public online consultation for the three supporting documents on the Adequacy Methodology.

- > 10 July-20 September: Public Consultation on TYNDP
The draft ENTSO-E Ten-Year Network Development Plan (TYNDP) 2014 describes the strengthening of the European power grid planned until 2030 as the most cost-efficient and secure way to integrate up to 60% of renewable energy.
