

Harmonised Allocation Rules

**HAR SAG meeting
14 January 2015**

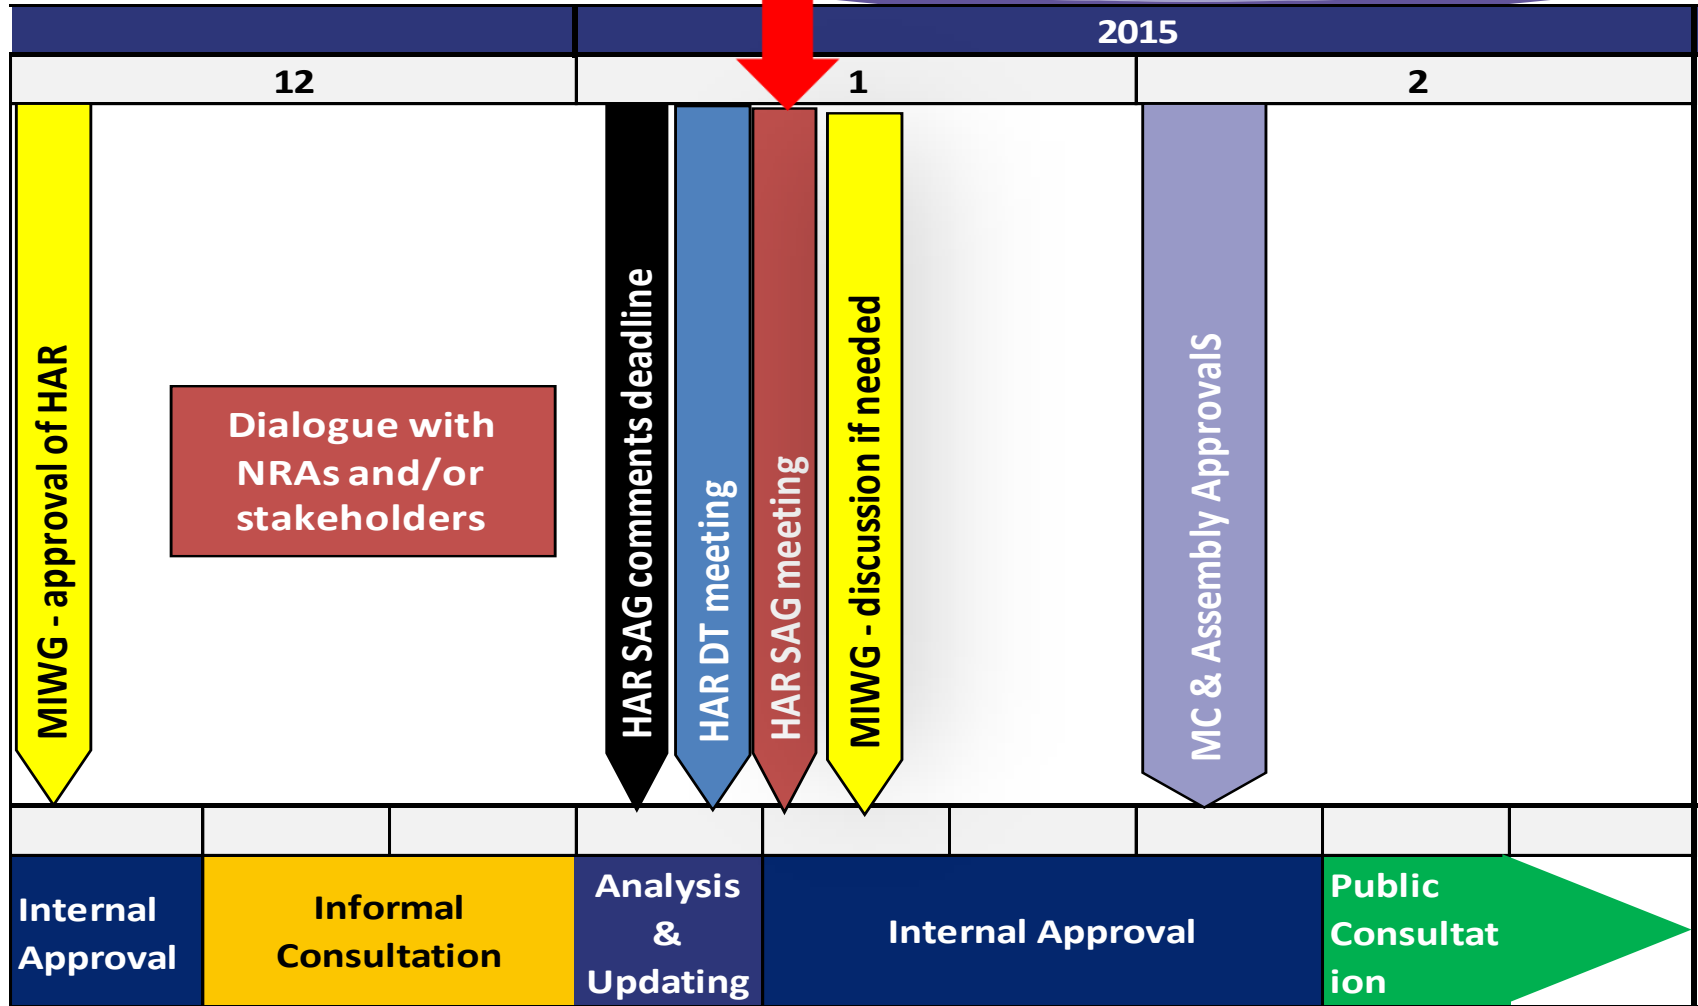

Mark Csete
ENTSO-E Market Advisor

HAR project plan I,

HAR project plan II,

This is where we are

HAR SAG member comments

Detailed comments received from ACER, EFET and EURELECTRIC

Most of the comments on firmness, but feedback was given on each chapter
→ well balanced

HAR DT meeting 12-13 Jan to assess all the comments
many comments have been accepted which proves the value of the HAR SAG

Article by article discussion in the afternoon

Next draft of HAR

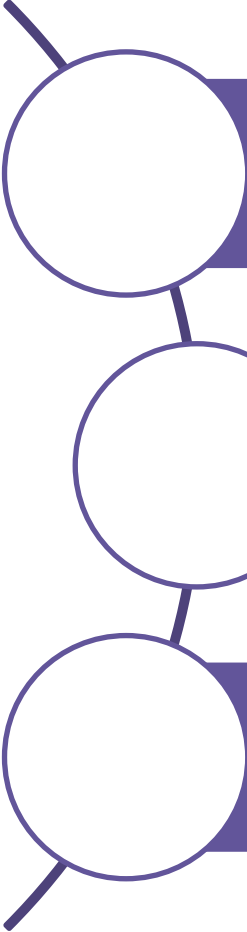

Stakeholder requests for FTR option provisions: it is very likely to be included (high level confirmation is needed)
→ even bigger geographical scope to be covered by the HAR than the scope of this project

List of concerned borders also will be included in the HAR

Next HAR to be released for public consultation

Border specific annexes are being drafted on national or regional level.
NRA-TSO discussion is ongoing, progress has been made in several regions already
Aim is to include all of them for the public consultation on EU HAR organised by ENTSO-E

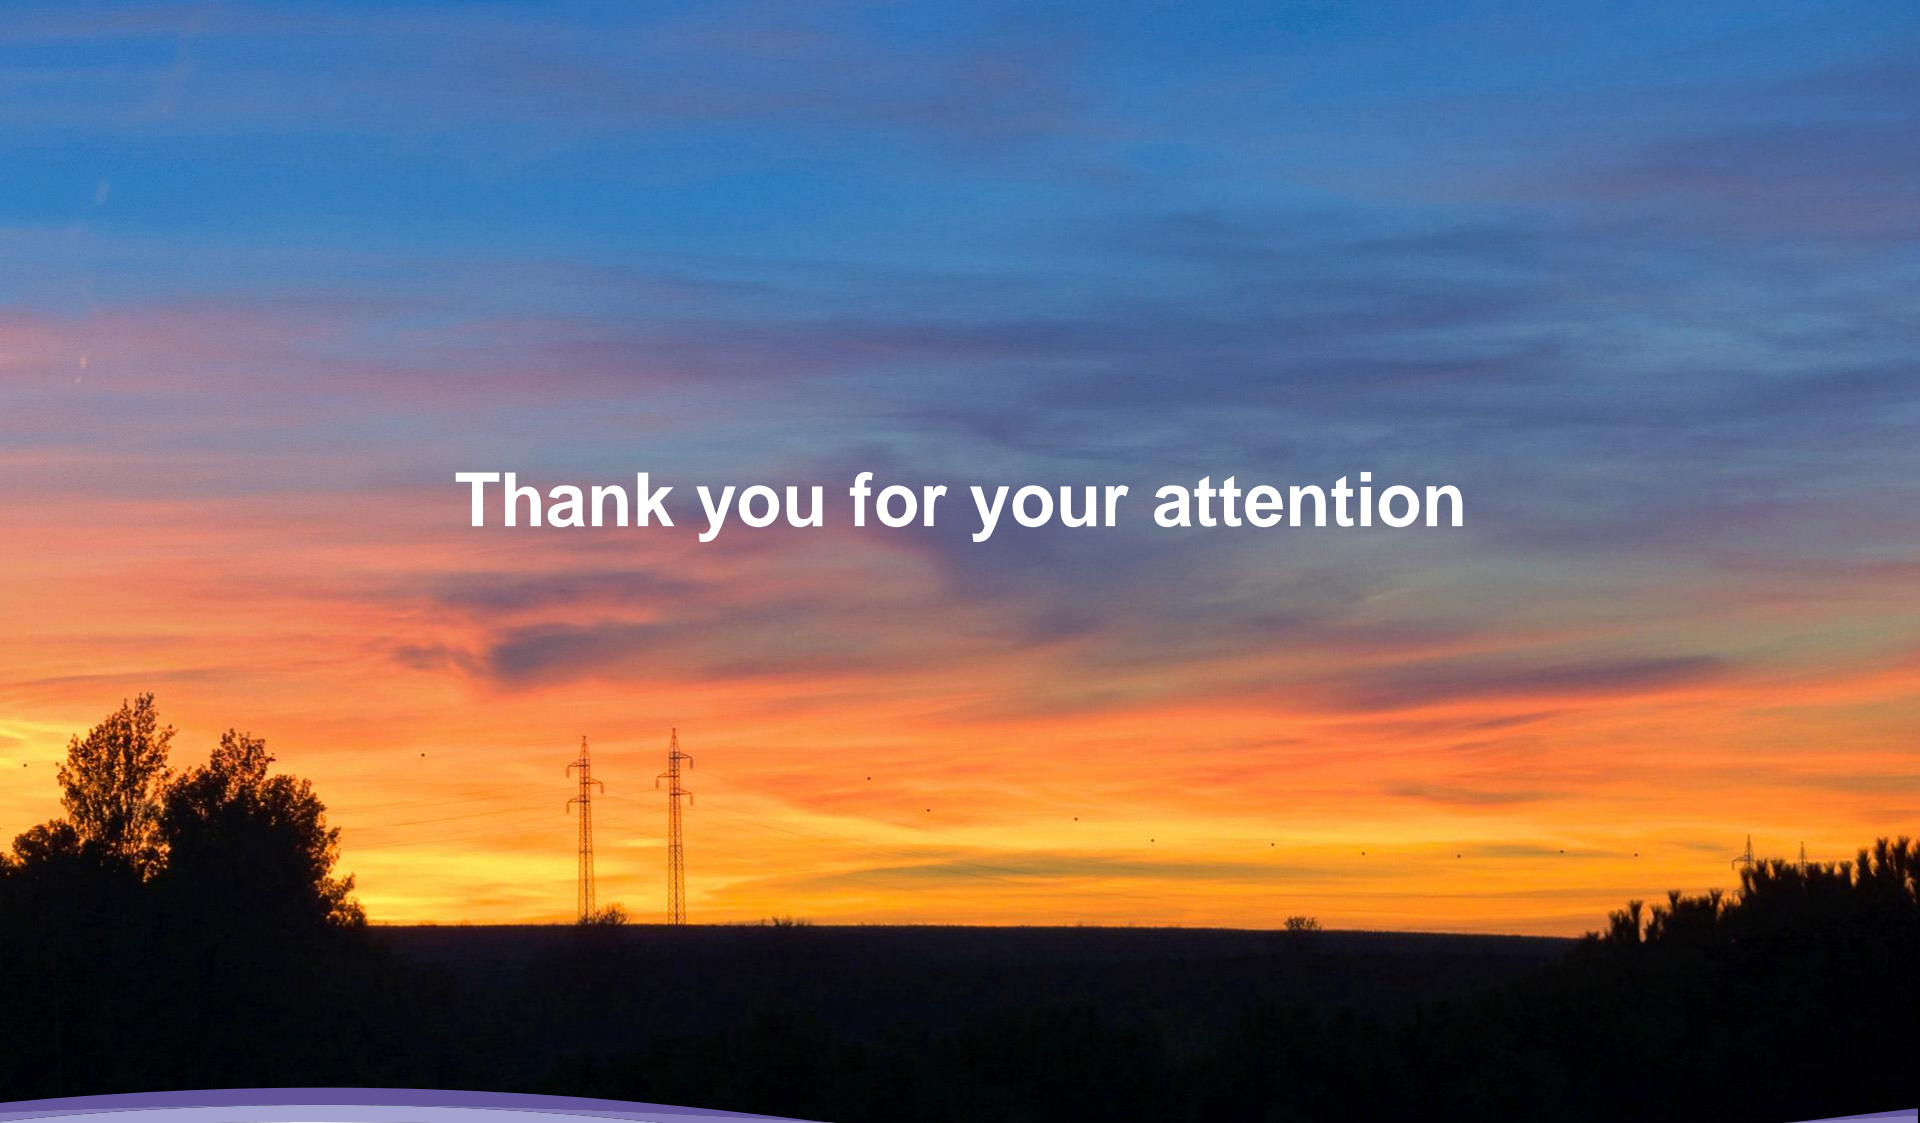

Additional rules for other timeframes and processes

TSOs to draft and consult on the rules for other timeframes (daily explicit, fallback) and for nomination rules
ENTSO-E will follow up on the progress to ensure the best possible outcome

Some of these rules will be most probably regional like shadow auction rules (fallback for day-ahead allocation)

Goal is to submit them for NRA approval together with the EU HAR

Thank you for your attention
