**Indicative values for Net Transfer Capacities (NTC) in Europe**

**Summer 2009, working day, peak hours (non-binding values)**

**WARNING:**
These indicative values have been computed by extrapolation from standard situations, in order to evaluate the transfer capacity through a single interface for a typical exchange situation (European Reference Case Map also available on ETSO Website). Thus these figures are only indicative and they are not cumulative (they cannot be summed up). Maximum expected and implied values per country also intend to clarify this.

**Legend:**
- **NTC in MW - Value agreed by both countries**
- **NTC in MW - Different values are estimated between the two countries involved. The lower value is shown on top and the country providing the higher value is specified.**
- **NTC in MW - Value provided by only one country The country providing no value is specified.**
- **no realistic limit**

**Footnotes:**
1. This value is the maximum value for the whole profile
2. This value is the maximum value for the profile with a pro-rata growth
3. Maximum allowed value in MW is NL, FR and CH
4. Maximum allowed value in MW is NL, FR and CH
5. Maximum allowed value in MW is the profile with a pro-rata growth
6. Maximum allowed value in MW is the profile with a pro-rata growth
7. Maximum allowed value in MW is the profile with a pro-rata growth
8. Maximum allowed value in MW is the profile with a pro-rata growth
9. Maximum allowed value in MW is the profile with a pro-rata growth
10. Maximum allowed value in MW is the profile with a pro-rata growth
11. Maximum allowed value in MW is the profile with a pro-rata growth
12. Maximum allowed value in MW is the profile with a pro-rata growth
13. Maximum allowed value in MW is the profile with a pro-rata growth
14. Maximum allowed value in MW is the profile with a pro-rata growth
15. Maximum allowed value in MW is the profile with a pro-rata growth
16. Maximum allowed value in MW is the profile with a pro-rata growth
