| Hungary ( HU )              | HU   |      |                   |
| Poland ( PL )               | PL   |      |                   |
| Romania ( RO )              | RO   |      |                   |
| Slovak Republic ( SK )      | SK   |      |                   |
| Denmark West ( DK_W )       |      | DK_W | DK_W <sup>4</sup> |
| Ukraine West ( UA_W )       |      | UA_W | UA_W              |
| Albania ( AL )              | AL   | AL   | AL                |
| Belarus ( BY )              |      | BY   | BY                |
| Denmark ( DK )              | DK   |      |                   |
| Denmark East ( DK_E )       |      | DK_E | DK_E              |
| Great Britain ( GB )        | GB   | GB   | GB                |
| Morocco ( MA )              | MA   | MA   | MA                |
| Republic of Moldavia ( MD ) |      | MD   | MD                |
| Norway ( NO )               |      | NO   | NO                |
| Sweden ( SE )               | SE   | SE   | SE                |
| Republic of Turkey ( TR )   |      | TR   | TR                |
| Ukraine ( UA )              |      | UA   | UA                |

Remark: When summing up the values, rounding deviations may occur.

<sup>1</sup> Denmark West represents the Western part of Denmark synchronously interconnected with UCTE (Jutland and Funen)

<sup>2</sup> FYROM = Former Yugoslav Republic of Macedonia

<sup>3</sup> Ukraine West represents the so-called Burshtyn Island synchronously interconnected with UCTE

<sup>4</sup> From June 2007 on full member of UCTE

<sup>5</sup> Including values of UCTE members in the particular year

The following information for the individual countries is presented on the next pages:

Thermal nuclear net production (national values)

Thermal conventional net production (national values)

Hydraulic net production (national values)

Other renewable net production (national values)

- of which wind

Not clearly identifiable net production (national values)

Total net electrical energy production,  
calculated to represent 100% of the national values

Physical import

Physical export

Total physical import/export balance

Consumption of pumps

National electrical consumption,  
calculated to represent 100% of the national values

Consumption load at 3:00 a.m. on the 3rd Wednesday,  
calculated to represent 100% of the national values

Consumption load at 11:00 a.m. on the 3rd Wednesday,  
calculated to represent 100% of the national values

Highest load on the 3rd Wednesday,  
calculated to represent 100% of the national values

Time of the highest load on the 3rd Wednesday

Power produced in parallel operation on the 3rd Wednesday at 11:00 a.m.

Similar information is represented in the following graphs of the Statistical Yearbook:

- Net production on pages 134 and 135
- Physical exchanges on pages 139, 140, 150 and 151
- Load curves on pages 98-111

Physical exchanges in interconnected operation

The exchanges CS, HR and SI in the year 1997 correspond to the historical country code YUGO and SIHR.

## Overview UCTE in figures 2007

---

| Countries  | AT <sup>1</sup> | BA    | BE    | BG    | CH    | CZ    | DE    | DK_W   | ES    | FR     | GR     | HR <sup>1</sup> |
|--|-----------------|-------|-------|-------|-------|-------|-------|--------|-------|--------|--------|-----------------|
| <b>Net production "All values are calculated to represent 100% of the national values"</b> |                 |       |       |       |       |       |       |        |       |        |        |                 |
| Thermal nuclear  | GWh             | 0     | 0     | 45854 | 13613 | 26344 | 24623 | 133203 | 0     | 52668  | 418609 | 0               |

| National electrical consumption,<br>calculated to represent 100% of the national values                  |  |     |      | 1997 53539<br>2006 66500<br>2007 67439 |
| Consumption load 3:00 a.m. on the 3rd Wednesday,<br>calculated to represent 100% of the national values  |  | MW  | max. | 1997 6529<br>2006 6638<br>2007 6403    |
| Consumption load 11:00 a.m. on the 3rd Wednesday,<br>calculated to represent 100% of the national values |  | MW  | max. | 1997 8575<br>2006 8951<br>2007 8979    |
| Highest load on the 3rd Wednesday,<br>calculated to represent 100% of the national values                |  | MW  | max. | 1997 8641<br>2006 9222<br>2007 9265    |
| Time of highest load on the 3rd Wednesday  |  |     | CET  | 1997 18:00<br>2006 18:00<br>2007 18:00 |
| Power produced in parallel operation on the 3rd Wednesday at 11:00 a.m.                                  |  | MW  | max. | 1997 8492<br>2006 10010                |

<sup>1</sup> Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

<sup>1</sup> These physical energy flows were measured on the cross-frontier transmission lines ( $\geq 110$  kV). These values may differ from the official statistics and the total physical balance in the table "Monthly values: Operation".

<sup>1</sup> Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

| Power produced in parallel operation on the 3rd Wednesday at 11:00 a.m.                                  | MW  | max. | 1997<br>2006  | 11526<br>11426          |

<sup>1</sup>Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

<sup>1</sup>These physical energy flows were measured on the cross-frontier transmission lines ( $\geq 110$  kV). These values may differ from the official statistics and the total physical balance in the table "Monthly values: Operation".

| Power produced in parallel operation on the 3rd Wednesday at 11:00 a.m.                                  | MW  | max. | 1997 10904              |
|  |     |      | 2006 12015              |

<sup>1</sup>Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

|  |     |      | 2007              | 0     |
| National electrical consumption,<br>calculated to represent 100% of the national values                  |     |      | 1997              | n.a.  |
|  |     |      | 2006              | 21733 |
|  |     |      | 2007              | 21794 |
| Consumption load 3:00 a.m. on the 3rd Wednesday,<br>calculated to represent 100% of the national values  | MW  | max. | 1997              | n.a.  |
|  |     |      | 2006              | 2090  |
|  |     |      | 2007              | 2116  |
| Consumption load 11:00 a.m. on the 3rd Wednesday,<br>calculated to represent 100% of the national values | MW  | max. | 1997              | n.a.  |
|  |     |      | 2006              | 3565  |
|  |     |      | 2007              | 3653  |
| Highest load on the 3rd Wednesday,<br>calculated to represent 100% of the national values                | MW  | max. | 1997              | n.a.  |
|  |     |      | 2006              | 3652  |
|  |     |      | 2007              | 3713  |
| Time of highest load on the 3rd Wednesday  |     | CET  | 1997              | n.a.  |
|  |     |      | 2006              | 18:00 |
|  |     |      | 2007              | 09:00 |
| Power produced in parallel operation on the 3rd Wednesday at 11:00 a.m.                                  | MW  | max. | 1997              | n.a.  |
|  |     |      | 2006              | 4876  |

<sup>1</sup>Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

<sup>1</sup> These physical energy flows were measured on the cross-frontier transmission lines ( $\geq 110$  kV). These values may differ from the official statistics and the total physical balance in the table "Monthly values: Operation".

|  |  |     |      | 2007 3036               |
| Time of highest load on the 3rd Wednesday  |  |     | CET  | 1997 n.a.               |
|  |  |     |      | 2006 18:00              |
|  |  |     |      | 2007 18:00              |
| Power produced in parallel operation on the 3rd Wednesday at 11:00 a.m.                                  |  | MW  | max. | 1997 n.a.               |
|  |  |     |      | 2006 2123               |

<sup>1</sup>Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

<sup>1</sup> These physical energy flows were measured on the cross-frontier transmission lines ( $\geq 110$  kV). These values may differ from the official statistics and the total physical balance in the table "Monthly values: Operation".

<sup>1</sup> These physical energy flows were measured on the cross-frontier transmission lines ( $\geq 110$  kV). These values may differ from the official statistics and the total physical balance in the table "Monthly values: Operation".

|  |  |     |      | 2006 945   |

<sup>1</sup> Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

<sup>1</sup>Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

## Monthly values / Operation

<sup>1</sup>Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

## Monthly values / Operation

These physical energy flows were measured on the cross-frontier transmission lines ( $>110$  kV). These values may differ from the official statistics and the total physical balance in the table "Monthly values: Operation".

<sup>1</sup> Before 2005, the information on renewable and not identifiable energy sources was collected in a different manner. Some countries added them to thermal conventional, some considered them as the part of not represented in the figures ( through the factor "representativity" ).

## Monthly values / Operation
