

Overview of the Network Code Development process

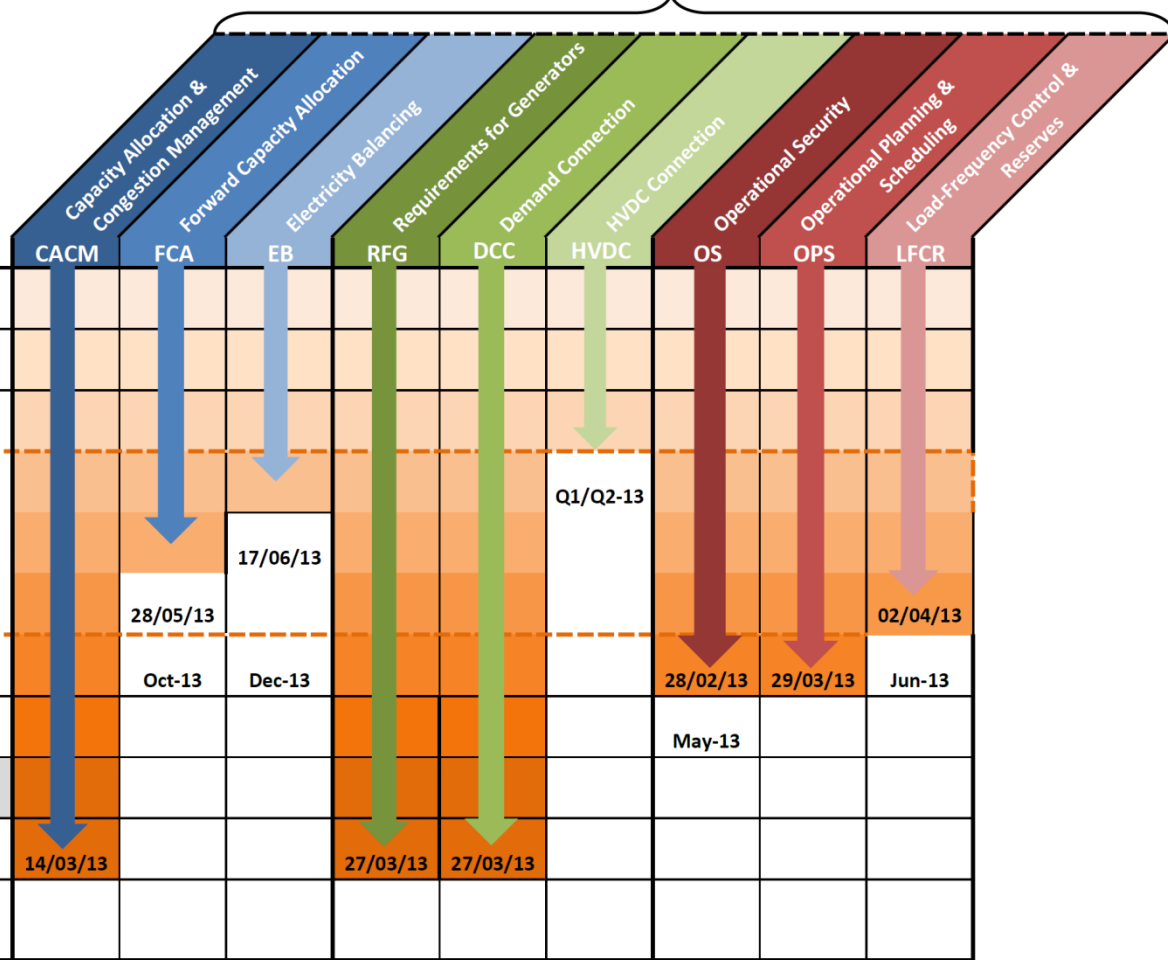

1st Public Workshop

A challenging project – progressing well

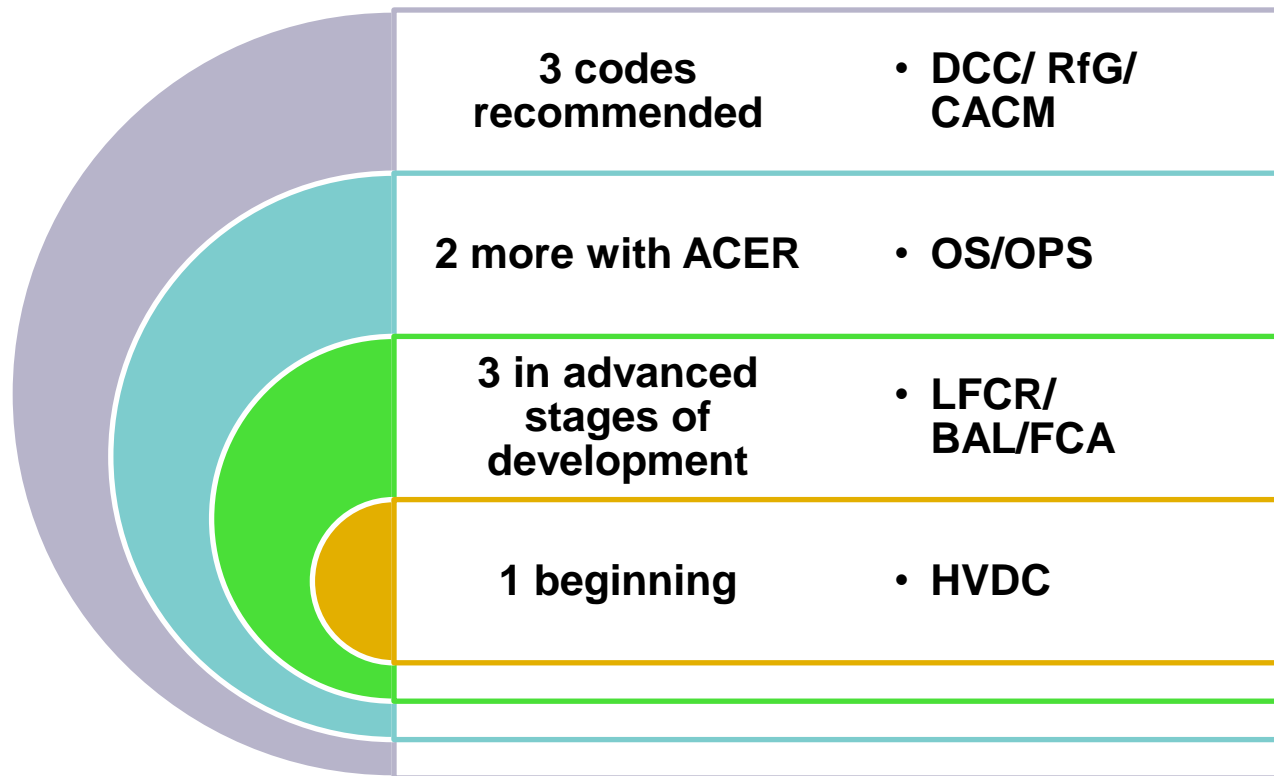

Delivery of the Third Package

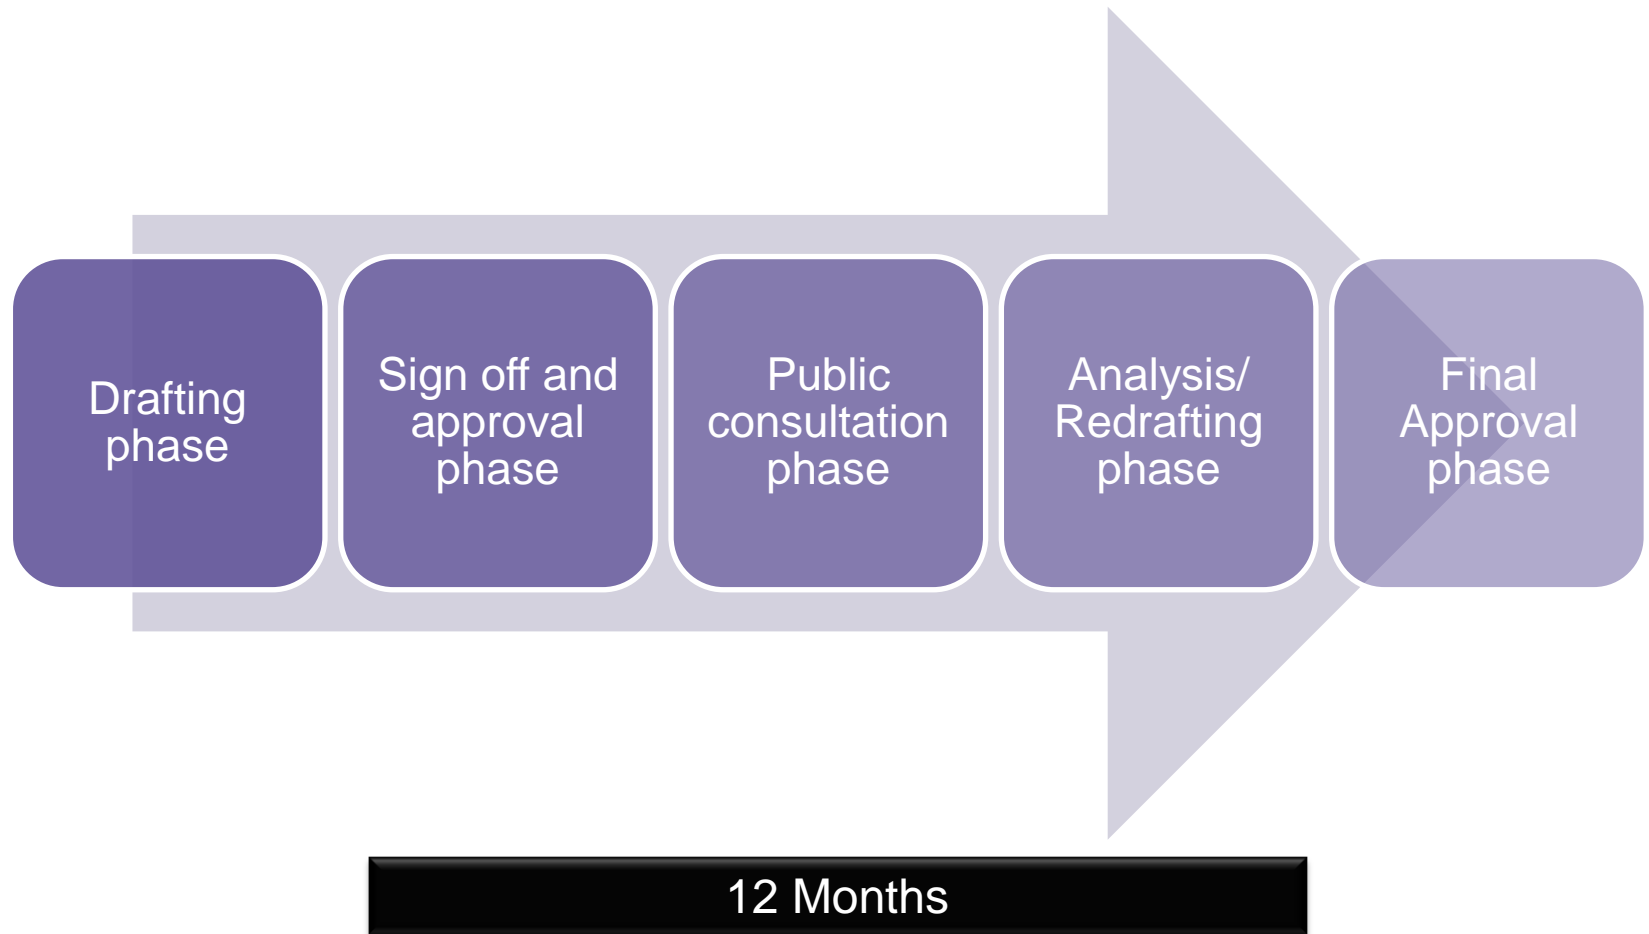

Network Code Status

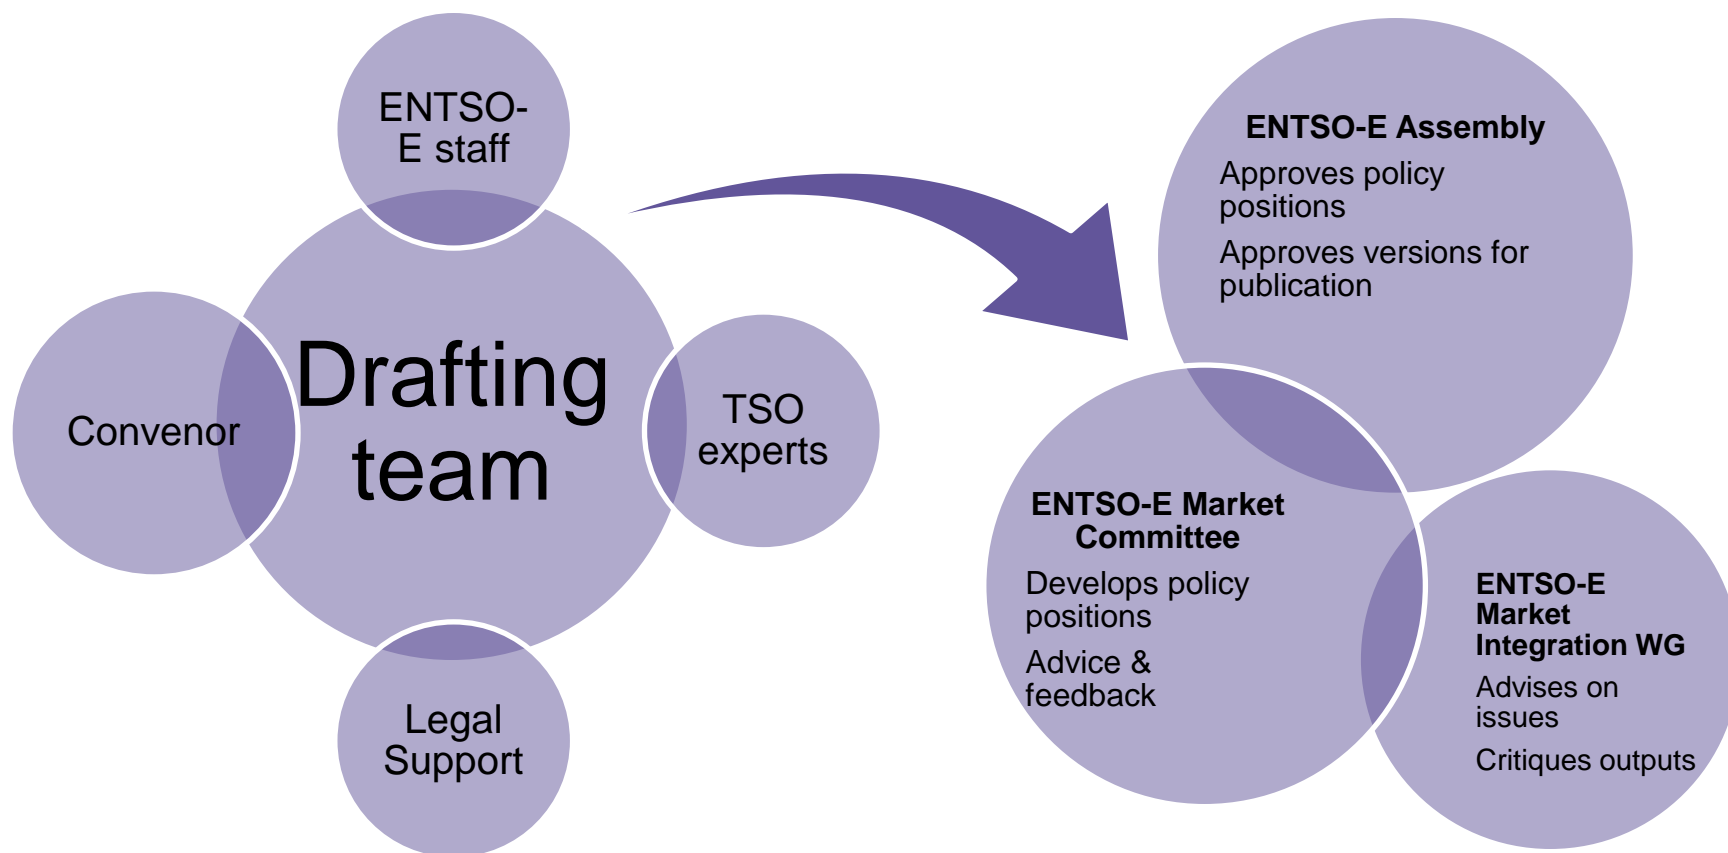

With 8 codes at an advanced stage

Steps within the 12 month period at ENTSO-E

The internal organisation within ENTSO-E and the approval process

Stakeholder engagement (I)

- **ENTSO-E is formally consulting on the FCA network code**
- **ENTSO-E has developed an IT tool to help facilitate consultation**
- **The code is accompanied by a consultation document providing more detail & explanation in a less formal manner**
- **Two months are given for comments**

Scope of the FCA network code

Forward markets

- To be tackled at a later stage.

Capacity Calculation

- Within the CACM code

Day Ahead Markets

- Within the CACM code

Intra-day Markets

- Within the CACM code

Balancing

- Subject of a separate code

FCA network code will be an integral part of the CACM package

Key elements of the FCA NC

**Capacity
calculation
(+ splitting
capacity)**

**Cross-
border
hedging
products**

**Harmonization
of Rules
(Allocation,
Nomination)**

**Single
Platform**

**Firmness
Regime**

High level timeline

Where we are now

Three SAG meetings held

Preliminary draft code shared in late November

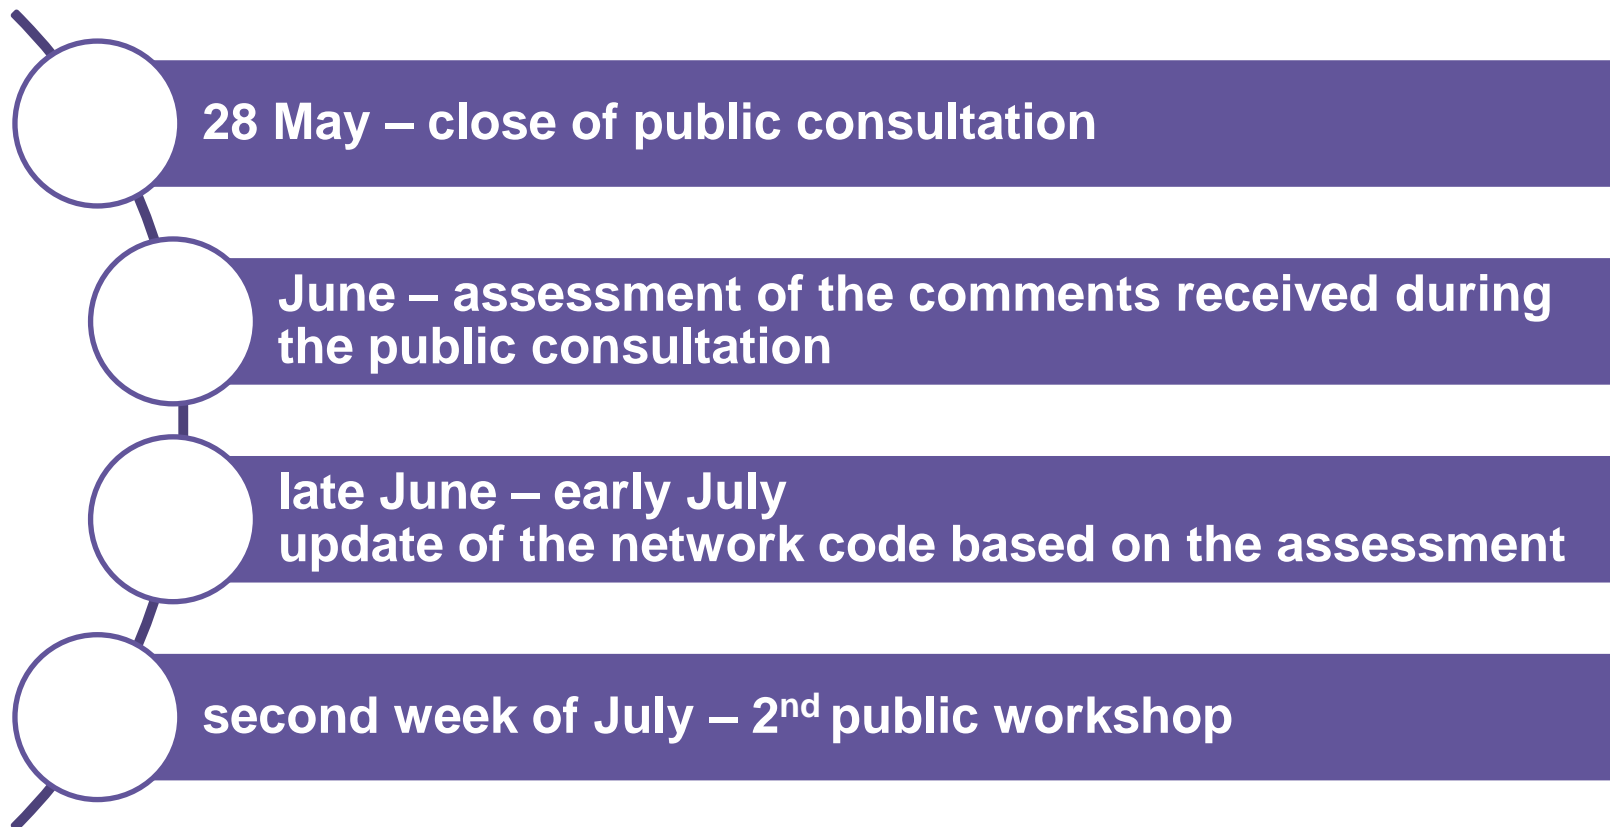

Consolidated draft released in mid January

Lively discussions on contentious areas - shows the importance and effect of the FCA NC

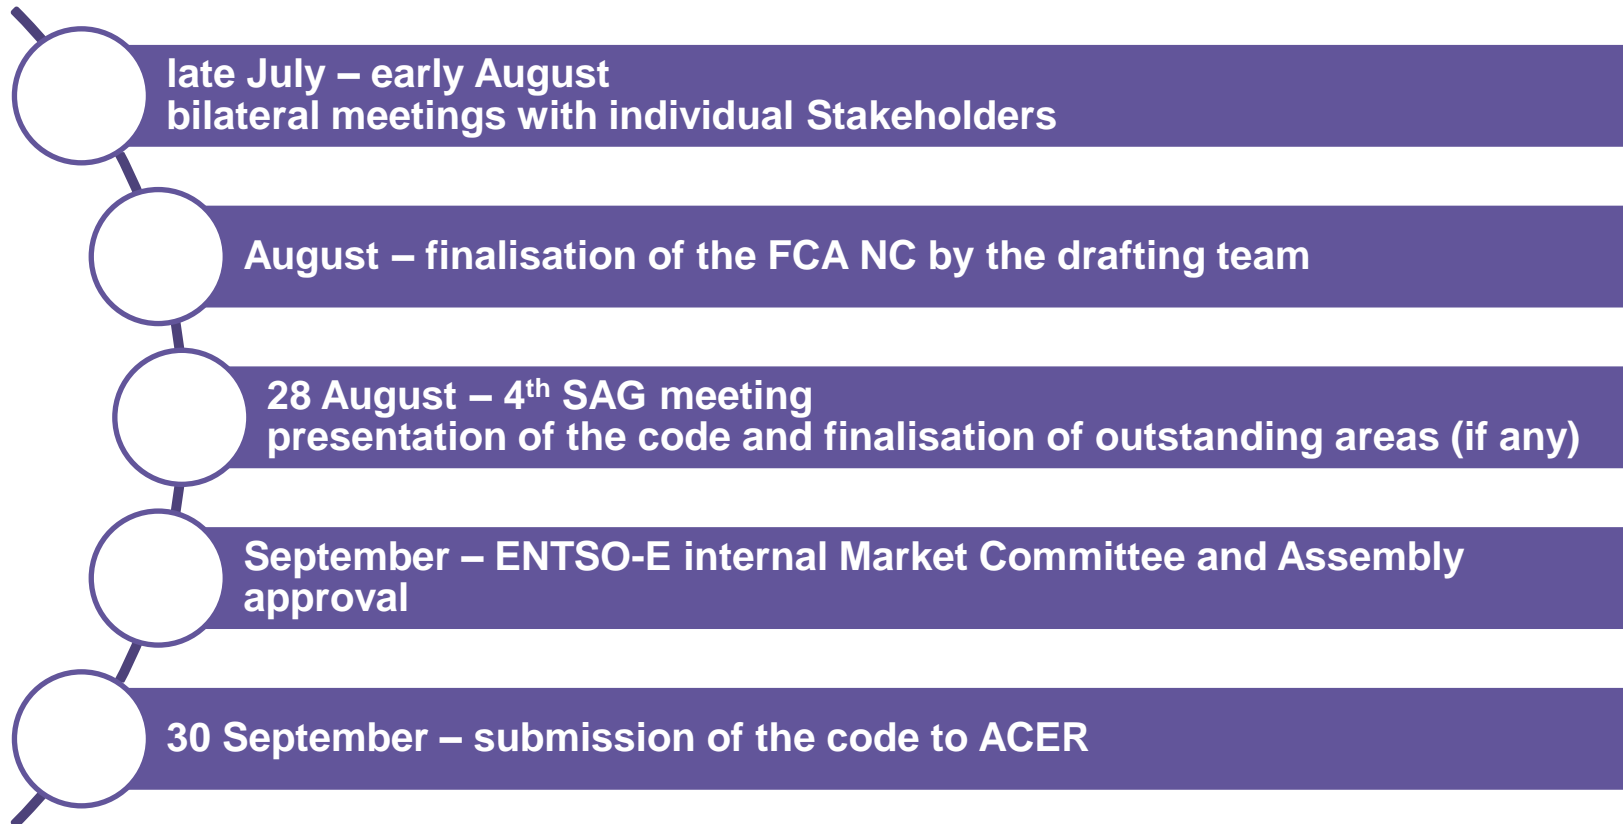

Constructive & helpful proposals from each Stakeholder

Bilateral meetings with individual Stakeholder associations over April

Several internal Drafting Team/Working Group/ Market Committee meetings

the way forward – longer term

Thank you for your attention
